Café Scientifique Orlando

On the first Wednesday of every month, scientific experts and lay community meet in a cafe or bar to explore the latest scientific ideas and discoveries, using plain language. Admission is free and you need no reservation—just come ready to listen and offer questions, opinions, and insight.

Upcoming talks

January 5: 'Genetics of Autism'

Dr Patricia Wheeler (division chief of Genetics and Metabolism at Nemours Children's Clinic) will talk about the heritable contributing factors of autism.

February 2: 'Deep Time and Shallow Thermodynamics'

Dr. Daniel Britt (Assoc Prof at UCF) will talk about the history of thinking about the age of the earth, and about what we now know about its geochemical evolution, including radiometic dating practices.
